## WIRELESS DOORBELL & TELEPHONE SIGNALER DB200

The all new, state-of-the-art, DB 200 is the only doorbell, telephone and intercom signalers that require no wires and can be installed in seconds.

The DB200 combination model has a built-in telephone signaler. Just plug the telephone cord into a modular telephone jack. It's low equivalent # does not draw any phone line power.

Unlike competing models, the DB200 is not triggered by sound, so annoying false alarms are a thing of the past.

Other advanced features include:

- 1) selectable number of flashes (5 or 10)
- 2) different flash code for front door, rear door, or intercom (requires additional sensor, sold separately)
- 3) A built-in chime for hearing members of the family (can be turned off).
- 4) The DB200 has a built-in outlet to flash an attached lamp and each sends a signal to all Sonic Alert remote receivers
- 5) Use additional transmitters (up to four) to be alerted at other doors. Optional DB100T needed for additional doors (sold separately)
- 6) Works with all Sonic Alert Receivers (eg. BL300, RH100, SA101, SA201)
