- Loud ringer with adjustable volume and ring tone

Hear More, Understand Better

Just plug and play. This phone comes with these settings: amplifiers comes on automatically when you lift the handset, high ringer volume and tone, tone dialing.

It's as easy as 1,2,3

1. **To program a number into a photo memory button**

    1. Lift the handset and press PROG (ignore any dial tone or busy tone in handset)

    2. Enter the phone number on the dial pad

    3. Press PROG

    4. Press the photo memory button where you wanted to store this number

    5. Return the handset to its cradle

    6. If you made a mistake or want to program a new number into the same memory button, repeat the above steps

2. **To dial from photo memories---lift the handset and press the desired photo memory button**

3. **To adjust Volume (the amplifier must be on)— slide the VOL switch to suit**

4. **To adjust Tone (the amplifier must be on)---slide the TONE switch until you hear and understand the best**

5. **To talk hands-free---press SPEAKER to turn on speakerphone**

It's as easy as 1,2,3

1. **To program a number into a speed dial memory**

    1. Lift the handset and press PROG (ignore any dial tone or busy tone in your handset)

    2. Enter the phone number on the dial pad

    3. Press PROG

    4. Press the memory button where you wanted to store this number
